

IS CANCER DUE TO BAD GENES? OR JUST BAD LUCK?

Many people have loved ones with cancer. But what caused these cancers? Is it an exposure we can escape? Or our inherited genes, which we can't escape?

Come to this talk by experienced oncologist and Rutgers-RWJ professor Michael J. Nissenblatt, MD to learn how to recognize the difference and use that information for cancer prevention.

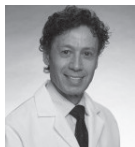

Is Cancer Due to Bad Genes? Or Just Bad Luck?

What to think and do when there's cancer in your family

Wednesday, April 6, 2016 – 7:00pm to 8:30pm.

East Brunswick Public Library, Mtg Rooms 2 & 3
