

IS CANCER DUE TO BAD GENES? OR JUST BAD LUCK?

What to think and do when there's cancer in your family

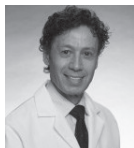

Many people have loved ones with cancer.
But what caused these cancers? Is it an exposure
we can escape? Or our inherited genes, which
we can't escape? Learn how to recognize the
difference and use that information for
cancer prevention.

Wednesday, April 6, 2016 – 7:00pm to 8:30pm

**East Brunswick Public Library, Mtg Rooms 2 & 3
