

IMMUNO-ONCOLOGY: USING THE BODY'S IMMUNE SYSTEM TO TREAT CANCER

Attend our **FREE** event to learn about **new immunotherapy treatments for common cancers.**

Phillip D. Reid MD will discuss what patients should know about new immunotherapy treatments for common cancers.

~~Immunotherapy uses your body's own immune system to fight cancer. It enables the immune system to recognize, target and eliminate cancer cells wherever they are in the body.~~

Issues to be addressed include:

- What is cancer immunotherapy?
- How does immunotherapy work in your body?
- How is immunotherapy different from other treatments?
- What side effects might be experienced while on immunotherapy?
- What types of cancers can immunotherapy treat?
- Can immunotherapy be used together with other treatments, like chemotherapy, radiation, surgery, targeted therapy and another immunotherapy?

IMMUNO-ONCOLOGY: USING THE BODY'S IMMUNE SYSTEM TO TREAT CANCER*

Light refreshments
will be provided!

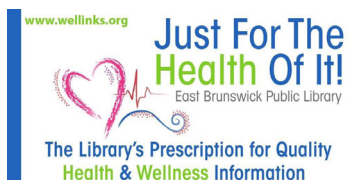

Presented by:

Dr. Phillip Reid, Medical Oncologist

Tuesday, April 24th, 2018 • 7:00 – 8:30 pm
