@ 12-1 PM**

Learn more in depth from cancer specialists
in this new addition to Astera Cancer Classes:

LOW PLATELET LEVELS AND ADVANCEMENTS IN TREATMENT

A better understanding of cancer-related conditions and how they can be managed is possible. Taught by Astera Cancer Care specialists and other local medical experts, our online presentations address some of the most pertinent areas in cancer treatments and advancements.

Discussion topics include:

- What is thrombocytopenia?
- What are platelets and what do they do?
- Conditions affecting platelet count and function
- Novel therapies in use for low platelet counts

If you or a loved one is affected by cancer in any way, we welcome and encourage your attendance. To register for this online event, go to <http://www.ebpl.org/calendar> and have your smartphone, tablet, or computer handy as well as reliable internet access. Once registered, we'll send you a link with additional instructions. We look forward to your attendance!
