

**TUESDAY
MAY 25, 2021
@ 12-1 PM**

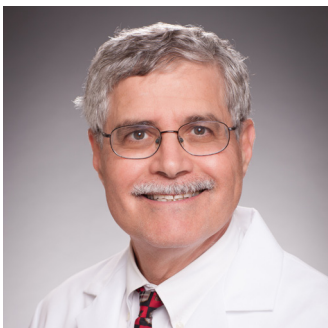

Learn more in depth from cancer specialists
in this new addition to Astera Cancer Classes:

MYELOPROLIFERATIVE DISORDERS (MPD), POLYCYTHEMIA AND OTHERS: TYPES AND TREATMENTS

A better understanding of cancer-related conditions and how they can be managed is possible. Taught by Astera Cancer Care specialists and other local medical experts, our online presentations address some of the most pertinent areas in cancer treatments and advancements. Discussion topics include:

- What is the family of diseases called the Myeloproliferative Disorders?
- How do you distinguish which one?
- How the different diseases are treated
- What are the newest developments and treatments?

If you or a loved one is affected by cancer in any way, we welcome and encourage your attendance. To register for this online event, go to rebrand.ly/schuman and have your smartphone, tablet, or computer handy as well as reliable internet access. Once registered, we'll send you a link with additional instructions. We look forward to your attendance!

Presented by:

Richard Schuman, MD, FACP

Board Certified Medical Oncologist
and Hematologist
